

# EVOLUTION WASTE MANAGEMENT

## Environmental Policy

Our Environmental Management Policy commits us to delivering reliable and credible services in a manner that positively supports environmental sustainable business practice.

We all share this responsibility and so undertake to adopt and adhere to the principles of this Environmental Policy. We shall...

- Integrate environmental management considerations into our day to day operation and workplace disciplines.
- Comply with all relevant legislation, regulations and codes of practice
- Promote understanding and adopt the application of good environmental work practices within and across our business operation.
- Raise awareness of environmental impact to our Supply network through our Code of Practice and Supplier Audit
- Monitor and manage energy utilisation to drive energy efficiencies
- Optimise the use of technology in the day to day business administration e.g. issuing of soft copy invoices.
- Encourage the adoption of sustainable methods of transport for staff
- Adopt the quality hallmarks of ISO 14001:2015, ISO 9001:2015 and OHAS 18001: 2007 as the primary driver for business process, environmental management and occupational health and safety improvement across the business
